Dipartimento di Ingegneria Elettrica, Elettronica e Informatica

UNIVERSITÀ
degli STUDI
di CATANIA

In the framework of the IEEE Circuits and Systems Society Outreach Initiative 2017, the Italian Society of Chaos and Complexity (SICC) and the Department of Electrical Electronic and Computer Engineering of the University of Catania organize the 12th of a series of tutorial workshops annually organized to explore the emergence of new research fields in which the modeling, analysis and control of nonlinear phenomena play a role of growing importance. These workshops have been traditionally devoted to an interdisciplinary audience with particular attention to PhD students and young researchers. In this spirit, the workshop on Control of Complex Networks of Nonlinear Circuits and Systems is addressed to researchers working in various areas of science and engineering.

Venue:

University of Catania, Department of Electrical Electronic and Computer Engineering,
viale A. Doria 6, Catania, Italy

Speakers:

Guanrong (Ron) Chen, City University of Hong Kong

Mario di Bernardo, University of Napoli Federico II

Ernesto Estrada, University of Strathclyde, Glasgow

Mattia Frasca, University of Catania

Maurizio Porfiri, Tandon School of Engineering, New York University

Sandro Zampieri, University of Padova

Georgios Ch. Sirakoulis, Democritus University of Thrace
