

Call for Special Issues Proposals

IEEE Transactions on Circuits and Systems for Video Technology

The IEEE Transactions on Circuits and Systems for Video Technology (TCSVT) is now accepting proposals for Special Issues. We invite proposals that address **timely and emerging topics** across all areas relevant to TCSVT's scope.

The deadline for submission of special issue proposals to Associate EiC is **September 10, 2026**. The decision will be communicated to all applicants by **September 30, 2026**. Each proposal should include:

- A draft Call for Papers outlining the theme and a list of specific topics to be covered.
- A brief rationale explaining the significance and timeliness of the proposed topic.
- A detailed timeline, including manuscript submission deadline, review and revision deadlines (first and second rounds), and final manuscript due date.
- Short biographies of all Guest Editors, highlighting their relevant qualifications.
- Potential sources of submissions and an estimate of the expected number of submissions.

We recommend limiting the Guest Editorial Team to a maximum of six members, and strongly encourage including at least one current or former TCSVT Associate Editor (AE) or Senior Area Editor (SAE). Proposers should ensure diversity in geographic representation, gender, and institutional affiliation (spanning both academia and industry). We particularly welcome proposals that primarily involve industry experts and highlight industry-proven technologies.

Please send your proposal to:

Chia-Wen Lin

Associate EiC, IEEE TCSVT
